

COVER LETTER

Expression of Interest for Partnership in Emergency Response and Livelihood Sector

Dear International Organization for Migration (IOM) Team,

We are writing to express our strong interest in joining IOM's esteemed pool of preselected partners for large-scale emergency operations in response to the Syria Crisis. Recognizing the critical role of IOM since the initiation of Level-3 Emergency Response and Cross-Border operations from Türkiye, we are eager to contribute to your humanitarian activities in Syria, closely aligned with the 2022 Humanitarian Response Plan (HRP) priorities.

Our organization has diligently prepared all required documents to ensure compliance with your qualification criteria.

While we have recently embarked on a Water, Sanitation, and Hygiene (WASH) sector project in Northwest Syria (NWS), we are aware of the stipulation for projects to have been operational for at least six months to qualify for consideration. Given this, our current application focuses solely on the Emergency Response and Livelihood (ERL) sector, where we have established projects and proven capabilities.

We are fully committed to the principles of transparency and partnership that guide IOM's selection process. Looking ahead, we are keen on expanding our collaboration into the WASH sector once our new project meets the requisite operational duration.

Further to our initial expression of interest, we wish to elaborate on how Field Ready Türkiye is exceptionally positioned to meet the specific requirements outlined in the Call for Expression of Interest (CEI) for partnership in emergency operations in Syria. We are an active member of the ERL cluster and we have implemented several projects in the same sector previously. Our capabilities, experience, knowledge, and expertise align closely with IOM's criteria, ensuring our readiness and commitment to contribute effectively to your humanitarian initiatives in Northwest Syria (NWS).

Needs Assessment: Field Ready Türkiye conducts thorough needs assessments, identifying the vulnerabilities and requirements of target communities in NWS. Our methodology encompasses both quantitative and qualitative data collection, enabling us to prepare detailed reports that we readily share with IOM and our donors to inform program design and implementation strategies.

Program Design: We specialize in designing comprehensive early recovery and livelihood (ERL) programs that align with IOM's objectives in NWS. Our approach integrates community engagement and evidence-based strategies to ensure relevance and efficacy in addressing the specific needs of the communities we serve.

Implementation Plan: Our team is adept at preparing detailed implementation plans, outlining timelines, activities, and milestones specific to NWS. This structured approach ensures clear direction and efficient program execution, facilitating the achievement of desired outcomes.

Reporting and Verification: Field Ready Türkiye is committed to transparency and accountability. We regularly report on program activities, achievements, and the respective means of verification, ensuring that all stakeholders are informed of our progress and the impact of our interventions.

Data Collection and Sharing: Adhering to confidentiality principles and applicable Data Protection Protocols, we meticulously collect and share data on beneficiaries (BNFs) information, disaggregated by age and gender, along with other pertinent information as required by IOM.

Impact Reporting: We provide concrete evidence of the impact of our ERL activities, including success stories that highlight the interventions' positive changes and outcomes on individuals, families, or communities. These narratives demonstrate the tangible improvements and transformations achieved through our programs.

Monitoring and Evaluation (M&E): Our comprehensive M&E practices assess and track the effectiveness, efficiency, and impact of our programs and interventions. Through regular monitoring exercises, we gather insights, lessons learned, and recommendations for improvement, fostering continuous enhancement of our initiatives.

Cost-effectiveness and Accountability: Field Ready Türkiye prides itself on its ability to deliver project objectives in a cost-effective and accountable manner. We maximize positive outcomes for affected persons through sound financial management and regular communication with IOM units/departments, ensuring that our interventions are both impactful and sustainable.

We are confident that our proven track record and commitment to excellence will significantly contribute to the success of IOM's humanitarian activities in Syria. We are eager to discuss further how we can collaborate to make a meaningful difference in the lives of those affected by the crisis in NWS.

We appreciate this opportunity to apply and are ready to provide any further information or documentation as needed.

Thank you for considering our application. We look forward to the prospect of contributing to your vital work in Syria.

Sincerely,

İmadeddin Özcan
Director
